

Madrid, 08th of June, 2020

*To:
PPG Cleaning Concepts B.V.
Zwaalweg 5
2991ZC Barendrecht
The Netherlands*

The present letter is prepared per PPG CLEANING request, in order to explain that SGS has started Consultancy Services according to the EU Regulation 528/2012 (BPR) for the following products:

- *Evie Blue Oxy Foam hand sanitizer*
- *Evie Blue Oxy Gell hand sanitizer*
- *Evie Blue Hygienic Sanitizer hard surface cleaner*

These Consultancy Services consist on:

- Evaluation of the status of the active substance peracetic acid/product type combinations according to BPR Regulation.
- Contact with the authorities where the product is planned to be commercialized (German and Dutch).
- Report elaboration with all this information and indicating the specific requirements that must be fulfilled to put these products on the market.

As above mentioned, this is the first approach to confirm the applicable authorization process for PPG CLEANING products, hence we can't state yet that the authorization process has started.

Once this assessment has concluded PPG CLEANING will be able to decide on the best approach and regulatory needs for the target product based on the status of the biocidal product, to ensure compliance with BPR.

Kind regards,

(D^a. Rebeca González Miguel)
